

Tests for Zika virus infections and other tropical diseases

Pathogen	ELISA	IIFT	Pathogen	ELISA	IIFT
Chikungunya virus	■	■	SARS coronavirus 2 (SARS-CoV-2)	■	
Crimean-Congo fever virus	■		<i>Schistosoma</i>	■	■
Dengue virus 1–4	■	■	<i>Strongyloides</i>	■	
<i>Echinococcus</i> ¹	■		TBE virus	■	■
Hantavirus ¹	■	■	<i>Toxocara canis</i> ¹	■	
Japanese encephalitis virus	■	■	<i>Trypanosoma cruzi</i>	■	
<i>Leishmania donovani</i>		■	Usutu virus	■	
Mayaro virus	■		West Nile virus	■	■
MERS coronavirus (MERS-CoV)	■		Yellow fever virus		■
<i>Plasmodium</i>	■		Zika virus	■	■
Sandfly fever virus	■ ²	■			

¹immunoblot also available, ²only Toscana virus available

Further tests for research use only and not for in vitro diagnostics:

IIFT for the detection of antibodies against Barmah Forest virus³, bornavirus, Crimean-Congo fever virus, Eastern equine encephalitis virus⁴, La Crosse virus⁴, MERS coronavirus (MERS-CoV), Murray Valley encephalitis virus³, Rift Valley fever virus, Ross River virus³, SARS coronavirus (SARS-CoV), Sindbis virus, St. Louis encephalitis virus⁴, Venezuelan equine encephalitis virus, Western equine encephalitis virus⁴

³Arbovirus Mosaic Australia 2, not available as individual parameter; ⁴Arbovirus Mosaic America 2, not available as individual parameter
